

# Glitch Platform UX for Collaboration:

Owner's end:

- 1. Use dropdown; search for user
- 2. Dropdown shows user's username. Click the username and it populates textbox with proper username
- 3. Click "Share"

New user shows up under "Project members" heading with a "Pending" status next to username

Collaborator's end:

- 1. Receives email saying @dmawer has invited you to join a project on Glitch
- 2. Click "Join [title of project]"
- 3. Browser takes user to project page

(Clicking "Share" from collaborator's end shows static "Project members" page with usernames and permissions (dmawer - owner)

Owner: TRANSFER OWNERSHIP: (Feature, yes or no?)

- 1. Navigate to "project members" heading under SHARE
- 2. Click dropdown next to user; select "Owner"
- 3. Dialog box appears: "Are you sure you want to transfer ownership of this project to [user]?"
- 4. Click "Yes, Transfer" or "Cancel"

At this point, no email notifications happen; ownership is simply transferred to selected user

Owner: Boot collaborator from project

- 1. Navigate to "project members" heading under SHARE
- 2. Click dropdown next to user; select "Remove"

Collaborator:

- 1. If project window is opened, popup says "you've left this project" and another popup says "error loading project. Try refreshing the page?"
